## **Let's Work together with Consultancy Bureaus at UDSM**

### **Management Development Consultancy Bureau (MDCB)**

MDCB is a consultancy unit of the University of Dar es Salaam Business School. Its main objective is to enhance skills transfer and improve managerial operations in today's environment through training and consultation. Its main service product lines are short term business management training courses and management consultancy services.

Areas of specialization in business management training fall under human resources management, marketing, finance and accountancy. MDCB also offers services for small and medium scale enterprises. Specific services provided to SME clients by MDCB depend largely on the clients particular needs.

### **Natural Sciences Consultancy Bureau (NSCoB)**

NSCoB is a consultancy unit of the College of Natural and Applied Sciences (CoNAS). It offers consultancy services related to the natural and applied sciences, i.e. chemistry, mathematics, physics, geology, botany, molecular biology and biotechnology, and zoology. Consultants from CoNAS also work closely with those from other units of the university in building teams that are capable of providing multifaceted solutions to clients' problems. Some of the services provided by NSCoB are: Environmental Impact Assessments; Geotechnical survey and investigation of earth materials; Technical advice on industrial formulations, waste disposal, water treatment, raw material use and development, and in quality control practices; Chemical/geochemical analysis of constituents in different substances: raw materials, soil, water, rocks, minerals, and environmental pollution; and Microbiological analysis on water, feedstuff, tooth pastes and soils

### **Bureau for Industrial Cooperation (BICO)**

Bureau for Industrial Cooperation (BICO) is a unit of the College of Engineering and Technology (CoET), University of Dar es Salaam that coordinates the provision of Public Service to the Tanzania community in the form of Consultancy and Professional Services in Engineering and related fields. BICO also provides the accumulated body of knowledge to the community through short courses (Professional Development Program). BICO was established in 1990 and is registered by the Engineers Registration Board (ERB) as an engineering consulting firm since 1999 and also registered by the National Environmental Management Council (NEMC) to carry out environmental impact assessment since 2017. BICO draws its expertise from a pool of highly trained staff available at CoET, where the majority are registered by ERB as Professional and Consulting Engineers. Moreover, BICO has access to the Laboratories available at CoET which are also registered by ERB as Materials Testing Laboratories.

The expertise of BICO is so diverse and covers areas such as structural design as well as structural integrity assessment of existing buildings, construction management and supervision, land surveying including GIS, geotechnical soil investigation, transportation engineering, highway engineering, mechanical and manufacturing engineering, materials testing, energy engineering, mining and metallurgical engineering, chemical and process engineering, ICT, electrical engineering, strategic management including corporate strategic planning, business planning, industrial engineering, water resources engineering, environmental engineering and textile design and engineering.
